Risks we protect you from

Discover peace of mind as we shield you from an array of potential risks through our comprehensive, tailored security services.

Financial Losses
Cyber-attacks & data breaches lead to financial losses.

Business Disruption
Cyber-attacks disrupt normal operations.

Clients / Users Trust
Security incidents erode trust, causing loss of business.

Remediation Costs
Inefficient incident management drives up costs.

Compliance Penalties
Non-compliance and breaches incur fines.

Intellectual Property Leak
IP Theft jeopardizes the core of a business.

Lost Prospects
Weak security deters potential clients.

Data Breaches
Unauthorized access to clients' personal information.

Our **Services**

Today's threat landscape is dynamic. The proliferation of disruptive technologies like mobile, social, cloud and big data has increasingly impacted protection strategies. These technologies will continue to add to the complexity and drive the security needs of the IT infrastructure and information assets.

Security Consulting

We can help you create a robust security environment with services that include threat assessments, policy reviews, development and planning.

Virtual CISO

The VCISO service offering provides an experienced security program oversight strategy for an organization without needing a dedicated full-time security officer.

Penetration Testing

Identify how an attacker would gain access to your environment and use those systems as a base for attacks on your network.

Web / Mobile App Testing

Website / Mobile Application Testing is detecting, checking and rectifying potential bugs in the website or app before making it accessible to its users.

Wireless Security

A Wireless Penetration test can help expose weaknesses and secure the Organization's Wireless devices from malicious attacks.

Risk Assessments

Aligned with ISO and industry standards, we identify vulnerabilities to strengthen cybersecurity, keeping your business secure and compliant.

Security Awareness Training

Security awareness training program addresses the Cybersecurity mistakes employees may make when using email, the web and in the physical world.
